Introduction

This report documents all five tasks completed as part of the Digital Ambassador Programme. The programme is designed to build foundational digital literacy skills, professional online communication, platform awareness, and cybercrime prevention knowledge among students. As a Digital Ambassador, the goal is not only to develop these competencies personally, but also to be equipped to teach and model them for peers.

Each task covers a distinct area of digital citizenship: awareness and quizzes, digital portfolio building, engagement with coding platforms, professional email etiquette, and cybercrime case study research. The following sections present the work completed, evidence gathered, and personal reflections for each module.

Task 1 — Digital Literacy Awareness Quiz

Overview

A Digital Literacy Awareness Quiz was created using Google Forms to test peers' understanding of safe internet practices, digital tools, and responsible online behaviour. The quiz was published and collected live responses linked automatically to a Google Sheets tracker.

Quiz Questions & Correct Answers

#	Question	Correct Answer
1	What is digital literacy?	Using digital devices and the internet effectively
2	Which of the following is a safe internet practice?	Using strong passwords
3	Which tool is used for online learning?	Google Classroom
4	What should you do if you see suspicious content online?	Report it to a trusted adult
5	What are important rules for staying safe on the internet?	Short answer (use internet effectively)

Evidence

The form was published and one test response was recorded, scoring 4 out of 5 points. The response data was automatically captured in a linked Google Sheets spreadsheet under the tab 'Form Responses 1', with columns for Timestamp, Score, and each question's answer.

Task 2 — Digital Portfolio Setup

Overview

Professional digital profiles were created across three platforms to establish a credible online presence as a student developer and Digital Ambassador.

Platforms Set Up

Platform	Profile URL	Purpose
LinkedIn	linkedin.com/in/astitva-negi-a71b06380	Professional networking & career identity
GitHub	github.com/astitva18	Code portfolio & version control
Kaggle	kaggle.com/astitvaxp	Data science learning & competitions

GitHub Activity

- Username: astitva18
- 2 public repositories created:
- Vityarthi-Project (Python)
- Vityarthi-Project-CSE — Library Book Management System (Python)
- 9 total contributions recorded in the past year

LinkedIn Profile

Profile set up with full academic information: B.Tech Computer Science at VIT Bhopal (Jan 2025 – May 2029), City Montessori School background, skills in Video Editing and Rapid Learning, and membership of InAmigos Foundation (IAF). Profile language set to English with a custom public URL.

Kaggle Profile

Profile created under username 'astitvaxp' with bio listing as CSE Engineering Student at VIT. Kaggle Achievements section enabled and set to display publicly. The account was created 4 months ago and is actively visited.

Task 3 — Coding Platforms & Practice

Overview

To demonstrate foundational programming competence, a HackerRank account was created and an introductory coding challenge was completed successfully.

Challenge Completed

Platform: HackerRank

Challenge: Solve Me First

Language: C++20

Result: All sample test cases passed (Score: 5/5)

Solution Code

```
#include <iostream>
using namespace std;

int main() {
    int a, b, c;
    cin >> a >> b;
    c = a + b;
    cout << c;
    return 0;
}
```

Test Case Results

Test Case	Input	Output
Sample Test Case 0	2, 3	5 (PASS)
Sample Test Case 1	2, 3	5 (PASS)

Task 4 — Professional Email & Etiquette Guide

Part A — Email 1: Assignment Extension Request

Field	Detail
To	professor.sharma@university.edu
From	astitva.negi@student.university.edu
Subject	Request for Assignment Deadline Extension – Research Methods (RM301)
Date	29 March 2026

Dear Professor Sharma,

I am writing to respectfully request a short extension on the Research Methods (RM301) assignment due on 1 April 2026. Over the past week, I have been unwell with a fever and have been advised rest by the university health centre. While I have made progress on the assignment, I am unable to complete it to the standard expected by the deadline.

I would be grateful if you could grant an extension of three to five days. I am committed to submitting quality work and will ensure the assignment is completed promptly. I am happy to provide documentation from the health centre if required.

Thank you for your understanding and time. I look forward to your response.

Yours sincerely,

Astitva Negi

Student ID: 2023RM0145 | Research Methods (RM301) | Year 2

Email: astitva.negi@student.university.edu

Part A — Email 2: Summer Internship Expression of Interest

Field	Detail
To	internships@techbridge.in
From	astitva.negi@student.university.edu
Subject	Application for Summer Internship 2026 – Computer Science Undergraduate
Date	29 March 2026

Dear Internship Coordinator,

I am Astitva Negi, a second-year undergraduate student pursuing a Bachelor of Technology in Computer Science at National University of Technology. I am writing to express my interest in a summer internship opportunity at TechBridge for the May–July 2026 period.

I have a strong foundation in Python, web development, and data structures, and I am eager to apply these skills in a professional environment. I have followed TechBridge's work in accessible technology solutions and believe my academic background aligns well with your team's mission.

I would welcome the opportunity to contribute to your projects and grow as a developer under your team's guidance. Please find my resume attached. I am available for an interview at your convenience.

Thank you for considering my application. I look forward to hearing from you.

Warm regards,

Astitva Negi

Part B — Social Media Do's and Don'ts Checklist

✅ DO's	❌ DON'Ts
Think before you post	Don't post when emotional or upset
Keep personal information private	Don't share confidential information
Use strong passwords and enable 2FA	Don't engage with or spread cyberbullying
Give credit when sharing others' content	Don't accept requests from strangers
Review and clean up your digital footprint	Don't plagiarise others' work
Verify information before sharing	Don't neglect your mental health
Engage respectfully in online discussions	

Part B — Reflection: Poor Digital Communication (100–150 words)

> *In 2018, a senior employee at a US tech firm was dismissed after old tweets resurfaced containing racially insensitive remarks — posted casually years before she joined the company. The posts had never gone viral, but a background check before a promotion brought them to light. The damage was irreversible: her professional reputation was destroyed, the company faced public criticism, and colleagues felt blindsided. What could have been done differently? She should have regularly audited her digital footprint, thought critically before posting opinions online, and understood that the internet archives everything permanently. A few careless words typed in seconds cost her years of professional credibility. This case illustrates why responsible digital communication is not just about the present — it is about protecting your future.*

Task 5 — Cybercrime Awareness Case Study & Prevention Guide

Part A — Case Study: UPI / Online Payment Fraud

Cybercrime Type: UPI / Online Payment Fraud

What Is UPI Payment Fraud?

UPI (Unified Payments Interface) fraud is a form of financial cybercrime in which attackers trick individuals into authorising fraudulent transactions through India's real-time digital payment system. Unlike traditional bank fraud, UPI fraud exploits human psychology rather than technical vulnerabilities — making it especially dangerous for everyday users.

How It Typically Happens — Step by Step

1. Initial Contact: The fraudster contacts the victim via phone, SMS, or WhatsApp, posing as a bank representative or a buyer on OLX/Quikr.
2. Building Trust: They claim there is an account issue or KYC update required, creating urgency — 'Your account will be blocked in 24 hours.'
3. The Deception: They send a collect request (payment request) on the victim's UPI app and say 'Enter your PIN to receive money.'
4. The Victim's Mistake: The victim enters their UPI PIN — which authorises an outgoing payment, not an incoming one.
5. Money Gone: Funds transfer instantly. UPI transactions are near-irreversible once completed.
6. Disappearance: The fraudster disconnects and blocks the victim immediately.

Who Is Usually Targeted?

- First-time UPI users unfamiliar with send vs receive flows
- Online sellers on OLX or Quikr expecting payment from strangers
- Senior citizens less familiar with digital payment interfaces
- Students and young adults lured by fake job offers or scholarship scams

Consequences

Impact	Details
Financial Loss	Victims typically lose Rs 5,000–Rs 2,00,000+ in a single transaction
Irreversibility	UPI transactions complete in seconds and cannot be reversed without bank and NPCI intervention
Psychological Harm	Victims experience shame, anxiety, and loss of trust in digital payments
Legal Complexity	Recovery is slow; many cases go unresolved due to difficulty tracing fraudsters
Repeat Targeting	Once identified as vulnerable, victims may be targeted again by the same network

Source: Ministry of Home Affairs, Annual Report on Cybercrime, 2023–24. UPI-related fraud accounts for a significant proportion of the 15+ lakh cybercrime complaints filed nationally in 2023–24 via the National Cyber Crime Reporting Portal.

Part B — Stay Safe Online: Prevention Checklist

#	Prevention Tip	Category
1	Use strong, unique passwords for every account	General Safety
2	Enable Two-Factor Authentication (2FA) on all accounts	General Safety
3	Never click links in unsolicited SMS, WhatsApp, or emails	Phishing
4	Keep apps, OS, and antivirus up to date	General Safety
5	Never share OTPs, PINs, or passwords with anyone — ever	General Safety
6	Review and revoke unnecessary app permissions regularly	Privacy
7	**You NEVER need a PIN to receive UPI money — if asked, it's fraud**	UPI Safety
8	**Never scan a QR code sent by a buyer or stranger to 'receive' money**	UPI Safety
9	Set a daily UPI transaction limit in your banking app	UPI Safety
10	Check bank statements weekly for unauthorised transactions	Financial Safety

Report Cybercrime:

- National Cyber Crime Portal: cybercrime.gov.in
- Helpline: 1930 (available 24/7 — call immediately after financial fraud)
- Your bank's fraud helpline — request a freeze on your account

Reflection — What Surprised Me Most (100–150 words)

> *While researching UPI fraud, what surprised me most was that the scam requires absolutely no hacking. Victims willingly hand over their PIN because they genuinely believe they are receiving money. The entire attack is psychological. I had always assumed cybercrime involved complex technical exploits; the reality is that the most damaging frauds exploit a simple gap in understanding — that entering a UPI PIN always means money leaves your account, never enters it. As a result, I will personally change one habit: I will never enter my UPI PIN during a phone call or under any pressure, no matter how convincing the caller sounds. I will hang up, breathe, and verify through the official app or bank helpline before taking any action.*

Conclusion

This project has been a comprehensive journey through the core skills required of a responsible and effective Digital Ambassador. Across five tasks, I have built a measurable digital presence, practised professional communication, engaged with coding platforms, and developed a deeper understanding of the cybercrime threats that affect students in India today.

The most impactful learning came from Task 5 — discovering that the most devastating cybercrimes are not technical but psychological was genuinely surprising. Understanding UPI fraud mechanics has already changed how I interact with payment requests, and I now feel confident explaining this to peers in plain language.

The skills developed through this programme — from writing professional emails to setting up GitHub repositories — are directly applicable to my academic and professional life at VIT Bhopal and beyond. I intend to continue building on this foundation and to actively share these learnings with my batch mates as a Digital Ambassador.
